WORK EXPERIENCE

Business Architecture Analyst (Technology Consultant) July 2024 – Present
Accenture | New York, NY

- Deliver data-driven solutions for enterprise clients, including reporting, analytics, and process optimization.
- Supported a large-scale data migration project, troubleshooting pipelines and resolving critical flow issues.
- Develop dashboards and visualizations that provide leadership with actionable business insights.
- Collaborate with client stakeholders to design and implement ad-hoc analytics solutions and operational improvements.

Senior Analyst November 2023– July 2024
Walmart | Hoboken, NJ

- Led a data analytics team, fostering collaboration and driving project success.
- Identified opportunities and business problems, framing them into advanced analytics initiatives.
- Developed dashboards and reports that improved visibility for management and streamlined decision-making.
- Conducted exploratory data analysis, ensuring data quality and integrity for reliable insights.
- Engineered new features and process improvements to enhance analytics workflows across teams.
- Partnered with product management and engineering teams to deploy scalable data solutions.
- Presented results and recommendations to leadership, enabling informed, data-driven strategies.

IT Manager May 2016 – Jul 2021
MKRS Law | Coral Gables, FL

- Oversaw IT operations for seven offices and 90+ users, aligning technology strategy with business needs.
- Delivered 30+ projects, including cloud migrations and software upgrades, reducing support tickets and boosting productivity.
- Managed IT budgets, vendor contracts, and negotiations, cutting turnaround time by 75% while lowering costs.
- Defined and implemented business and system requirements, ensuring successful project execution.
